

Certification Course in

# BIM Modelling (Architecture)

## INTRODUCTION

Building Information Modelling (BIM) is a process that involves the generation and management of the information about a facility. BIM allows for great integration and collaboration among different building professionals of various disciplines to explore digitally, and can be used throughout the entire building process from design stage through construction stage and even post construction building management.

## OBJECTIVES

The objectives of this course are:

- To provide an understanding of BIM processes and benefits
- To equip participants the practical 3D BIM Architectural Modelling skills and technical knowledge to start and support a project using BIM.
- To enable participants to be familiar with the e-submission template guideline

## CONTENTS

- BIM fundamentals
- BIM Tool User Interface
- Modelling a project
  - Mass Modelling
  - Site Modelling
  - Visualization
  - Insert External files
  - Modelling building elements
  - Project documentation
- E-Submission project template
- Worksets and Worksharing
- DOL creation

## LECTURERS

Practitioners from the built environment sector.

## ASSESSMENT AND AWARD

Electronic Certificate of Successful Completion (e-CSC) will be awarded to participants who meet the attendance requirement and pass the required assessment.

## PREREQUISITE

Applicants for this BIM Modelling Certification Course should possess CAD drafting/modelling experience in building and construction project.
