

LUFFING JIB TOWER CRANE OPERATION

俯仰塔吊操作

A 24 - hour course leading to a Certificate of Successful Completion

INTRODUCTION

Tower Cranes are often used on construction sites to improve productivity in high-rise construction work. In heavily built-up areas where there is site constraint, it might be necessary to use a Luffing Jib Tower Crane instead of a normal "hammer-head" Tower Crane.

The Luffing Jib Tower Crane includes several additional operational features. Existing tower crane operators need to be trained to operate the Luffing Jib Tower Crane safely and efficiently.

Existing tower crane operators who wish to operate a Luffing Jib Tower Crane should attend this course.

COURSE OBJECTIVES

This course aims to equip existing tower crane operators with the technical knowledge and skills to operate the Luffing Jib Tower Crane.

COURSE CONTENTS

This is a practical-based course. The course curriculum covers:

- Introduction and orientation to Luffing Jib Tower Crane Operation
- Safety devices
- Daily inspection and maintenance of the Crane
- Duties and responsibilities of an Operator
- Practical Lifting Operation

LANGUAGE OF INSTRUCTION

- English or Mandarin
