

MOBILE CRANE (TRUCK MOUNTED) OPERATION

卡车起重机操作

An 86-hour course that leads to a Certificate of Successful Completion required by MOM for registration to be a mobile crane operator

INTRODUCTION

Truck mounted mobile cranes are widely used on construction sites ranging from small housing projects to multi-million dollar ones. Such cranes are available in a wide range of sizes to suit different hoisting needs. Because of their ability to handle large loads and their ease of mobility, such cranes pose a danger on the site if they are not operated properly. Hence, all operators of such cranes are required to be formally trained. Participants who have successfully completed this course will be awarded a Certificate of Successful Completion. This certificate is a prerequisite for application to be an MOM-registered truck mounted mobile crane operator.

COURSE OBJECTIVES

To equip participants with the knowledge and skills for the safe operation of truck mounted mobile cranes.

COURSE CONTENTS

Module 1 (Theory)

- Principal components and configuration of mobile crane
- Safety devices and indicators
- Introduction to WSHA and subsidiary legislations
- Duties and responsibilities of crane operator
- Interpret load chart
- Job site consideration and safe operation of crane
- Risk Assessment and Permit to Work for lifting operation

Module 2 (Practical)

- Daily & weekly inspection
- Job site consideration and setting of out-rigger
- Basic crane operation and Safety in lifting operations
- Hand signal and telecommunication
- Practical lifting operations
