

# Streamlining Operations with Digitisation.

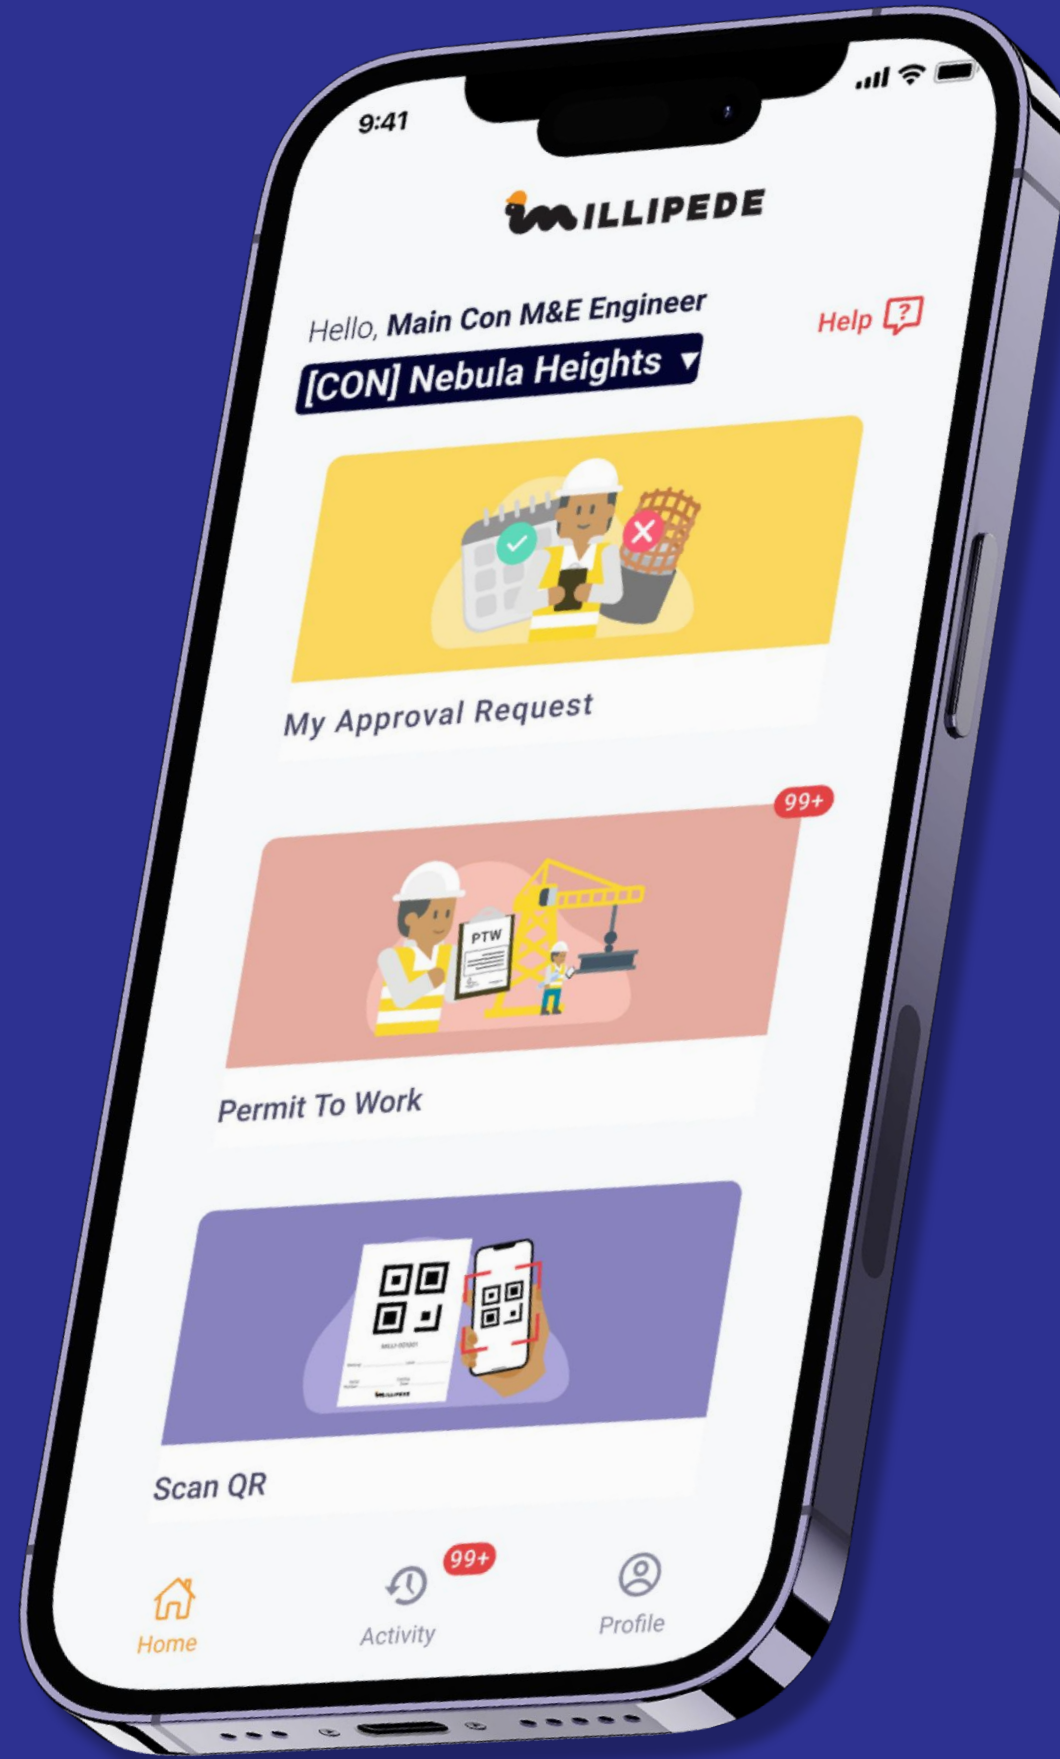

# About Millipede

*Our Capabilities*

# Mobile Application

Track Attendance & Manpower

Apply for Permits

Log & Manage Defects

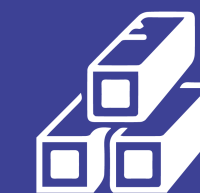

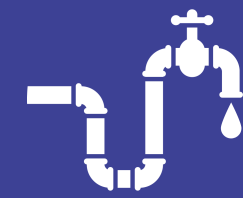

Digital Visitor Log

# Accurate **Data Capture** across all trades

**AND  
MORE...**

# Choosing a Digitisation Product

## *Key Considerations*

# Choosing a Digitisation Product

1

## Motivation for Digitisation

01

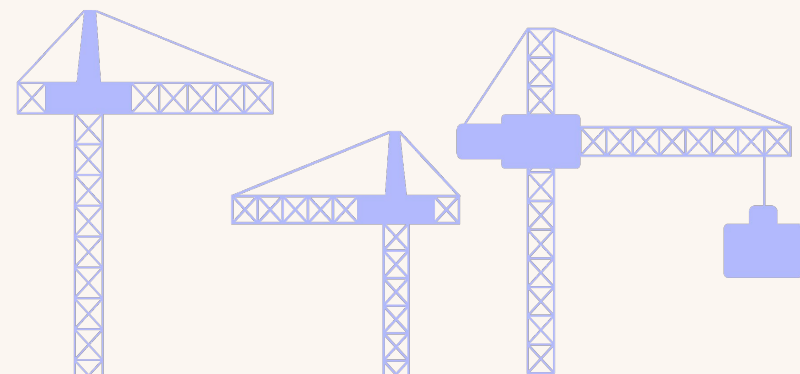

Want to fulfill IDD / Contractual requirement?

02

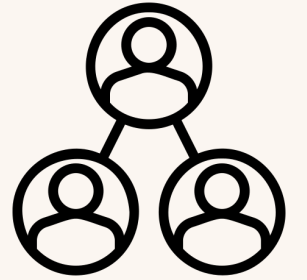

Want to be ahead of the game?

03

Want to gain better insights through data to drive productivity and efficiency?

# Choosing a Digitisation Product

2

Size of Organisation

01

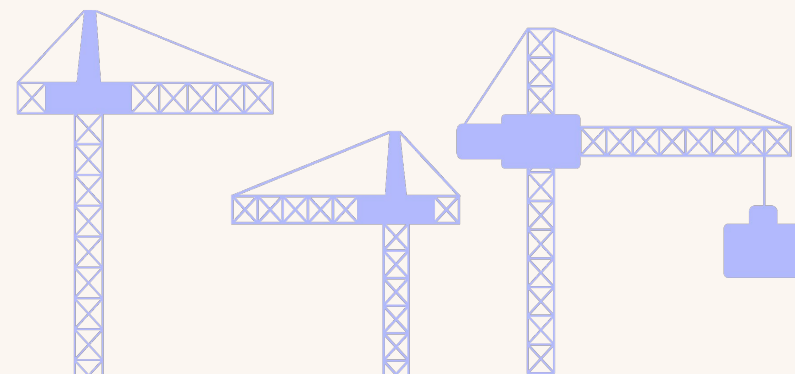

Am I looking for an enterprise plan?

02

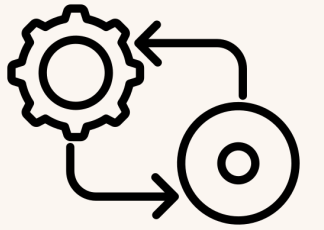

How am I going to digitise?

03

Do I have an availability of a core team to kickstart the initiative?

# Choosing a Digitisation Product

3

## Current Internal Processes

01

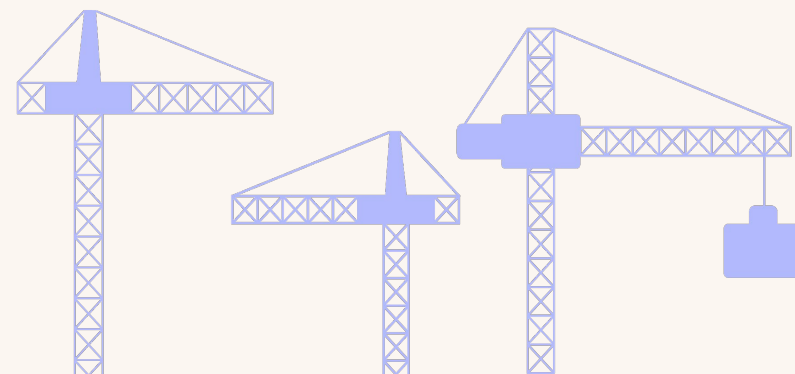

Am I going to digitise all internal processes?

02

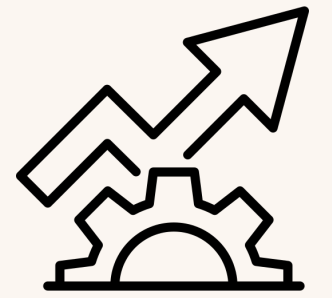

Are there any redundant manual processes that can be streamlined with the use of technology?

03

What do I want to digitise? Checklists?  
Recording of Jobs? Reports?

# Choosing a Digitisation Product

4

More than just Digitisation

01

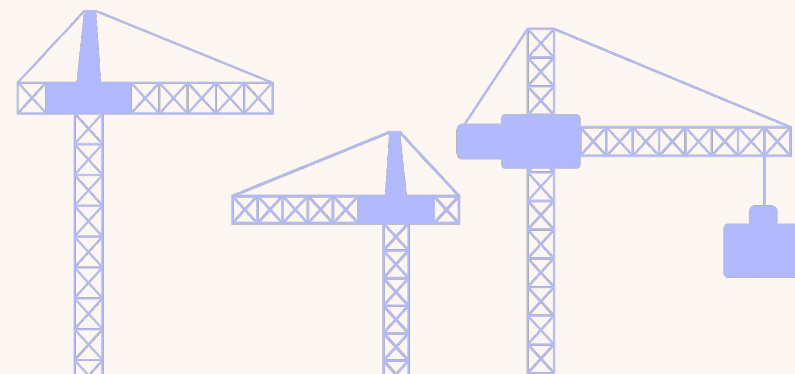

With the data collected, what do I want to see?

02

How does digitisation help improve my current internal process?

03

Is it cost-effective in the long run?

# Choosing a Digitisation Product

5

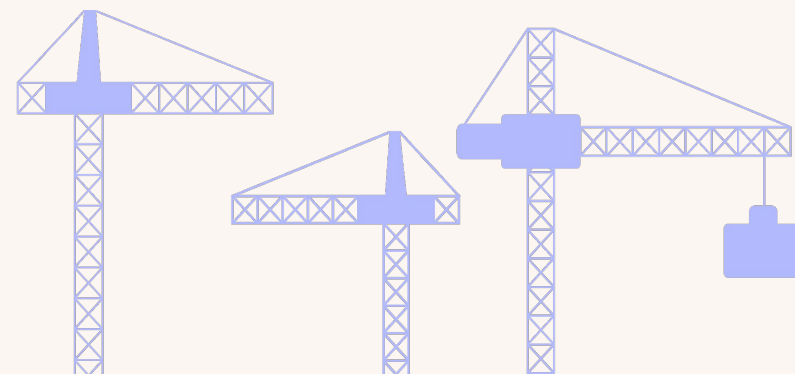

Data Security

01

Understanding of where your data is stored, streamed and owned.

02

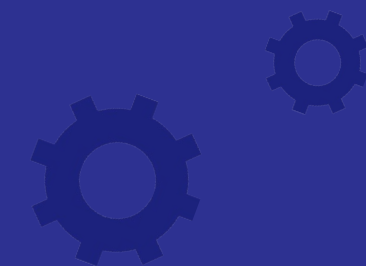

Are there any backup servers if the digital solution is cloud-based and data centres are down?

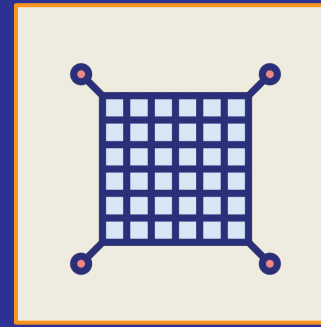

# Pitfalls & Best Practices

*Scenario-Based Comparisons*

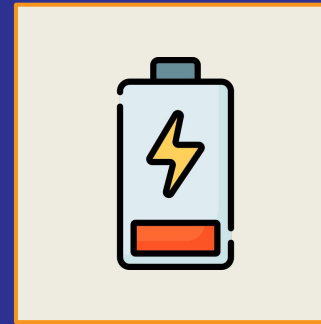

# Pitfalls

## The "Safety Net" Trap

Dual Manual/Digital Processes

## App Fatigue

Platform Fragmentation

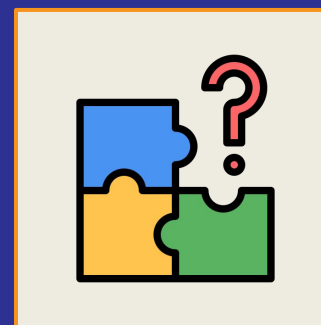

## Data Inaccuracy

Verification Gaps

## Reactive Implementation

Increased Cost

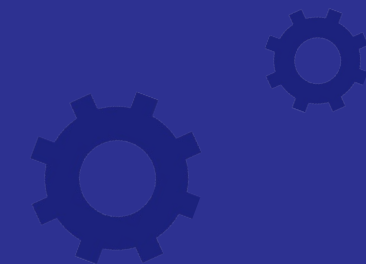

## Lack of Traceability

Information Finding Hurdles
