

BCA ACADEMY

FORCE AHEAD. TOGETHER.

COURSE PORTFOLIO 2024

FORGE AHEAD TOGETHER

One can achieve very little if operating alone. Instead, working together can bring us plentiful opportunities to achieve greatness, together.

Driven by this belief, BCA Academy works very closely with industry professional bodies and associations, public agencies, institutes of higher learning from both local and overseas, to create an efficient and effective platform for collaborative learning, to forge into the future collectively.

FORGE AHEAD. TOGETHER.

High-Impact

Business leaders today will need to re-imagine and re-invigorate business operations and strategies, to be agile and transform to a transitional leader. Equally important, building up a leadership pipeline will ensure continuous sustainability for the business.

Exposing these leaders, at the appropriate stage of their careers, to differing tasks will deepen their understanding of business operations and strategic thinking to deliver high-impact results in the longer term.

- Established since 1984
- Cumulative trainees > 1,200,000 people

FORGE AHEAD. TOGETHER.

Partnership

The world has become more integrated and interlinked. This calls for more collective collaboration amongst the industry stakeholders to achieve common goals.

It is imperative that industry trade associations, educational institutions, professional bodies, and also public agencies come together to establish strategic partnership to deliver a consolidated vision to strengthen the entire ecosystem and community.

A person in a dark suit is holding a smartphone in their right hand. The background is a low-angle shot of a modern glass skyscraper reaching towards a blue sky with soft clouds. Overlaid on the lower right is a glowing blue digital network of nodes and lines, with some nodes containing circular icons representing different aspects of technology or business. The overall tone is professional and forward-looking.

FORGE AHEAD. TOGETHER.

Perspectives & Insights

The advancement of digital technology and internet-of-things have leapfrogged the global economy. Organisations and individuals can only continue to progress with the right perspectives and insights that will propel greater achievement.

PMES

Professional, Managers & Executives

The Professional, Managers and Executives (PMES) is an important group in any organisation. They contribute significantly to the planning and operation, at the strategic and operational level, of businesses. In today's global economy, the PMEs must strive to be upskilled and re-skilled, so that they are equipped with the knowledge to be future-ready, resilient, and future-proof, to enable them to enhance their overall productivity and competitiveness to meet the business needs.

* For funding supported amount, please check the respective course pages at www.bcaa.edu.sg.

A woman with brown hair, wearing a white button-down shirt and a white watch, is working on a silver laptop. She is standing in front of a large window that looks out onto a city skyline at night. The city lights are blurred in the background. The overall tone of the image is professional and modern.

Acquisition of skills and knowledge to perform technical and related tasks on processes and operational methods provide a strong foundation for performance continuity. Given the complexity of the project requirement and challenges, the Technicians and Associate Professionals (TAPs) will need to adopt the learn-unlearn-relearn process, to better support business goals.

The development of Singapore, including its world-class infrastructure, airports, seaports, high-rise buildings etc, would not have attracted global attention if not for the contribution of the construction personnel (or tradesmen as they are more commonly known). Recognising the need to gear up for greater productivity and efficiency, the construction personnel must also be retrained to be multi-skilled, to deliver the project objectives.

The rapid development and evolving business environment in the construction sector provides a strong impetus for continuing education and training, to elevate individual and organisational excellence. Building on specialised skills in niche disciplines will lead to better opportunities for career advancement and deepen knowledge to facilitate overall performance at the individual and organisational level.
