Construction Contract Procurement & Negotiation

INTRODUCTION

Procurement is a process of acquiring a construction project. Selecting a suitable procurement strategy in consideration of the client's objectives is a key to the success of any construction project. Building upon the procurement strategy adopted, good negotiation skill is required to achieve a fair construction contract. This 2-day course aims to provide an understanding of the processes and methodologies in managing effective contract procurement and negotiation.

OBJECTIVES

At the end of the programme, participants should be able to:

- Examine the areas of processes and methodologies in construction contract procurement
- Understand how to develop successful procurement strategies
- Learn and apply effective negotiation skills in construction contracts
- Appreciate crucial elements in successful negotiation for construction disputes

CONTENTS

DAY 1

Procurement Contracts

- Principles of Construction Procurement
- Factors that affect the suitability of contract used
