Construction Contract Drafting & Dispute Resolution

INTRODUCTION

Recognising that disputes may arise even out of the most carefully drafted contracts, it is important to understand the processes and key skills that are necessary in common dispute resolution mechanisms. Understanding how each dispute resolution mechanism works before selecting the appropriate mechanism to govern the disputes will also provide better management of contract downstream.

This course is designed for practitioners in the construction industry who wish to learn the basic principles of construction contract drafting and appropriate dispute resolution. The objective of the course is to provide a proper training platform to impart the necessary technical skills and requisite legal knowledge in contract drafting.

OBJECTIVES

At the end of the session, participants should be able to:

- Understand the definitions of the clauses in the conditions of contract
- Identify common loopholes and pitfalls in contract drafting
- Understand key concepts / issues in Arbitration
- Know the various dispute resolution approaches
