

Building Better Together: Common Challenges, Smart Solutions and Inclusive Design

As industry professionals, you face evolving regulatory landscapes and increasing demands for accessible, compliant solutions. This seminar addresses your challenges by providing practical guidance on BCA's latest regulatory amendments and insights into common BP/TOP non-compliances that could impact your projects.

You'll discover how Artificial Intelligence (AI), smart inspection initiatives and Integrated Digital Delivery can streamline your workflows, making compliance Faster, Easier and Smarter. Learn how the Inter-Agency Coordinating Committee is creating a more business-friendly regulatory environment and gain insights from successful collaborative projects.

Whether navigating accessibility requirements, managing Fixed Installation Plan submissions, or optimising regulatory processes, this session equips you with actionable strategies. Join your peers in exploring how shared challenges can lead to innovative solutions that enhance both compliance and business outcomes.
